

## **Clue #2: Stig Waidelich's BC# Clearly Altered, Almost Certainly Given to Obama**

In the first installment (at <http://butterdezillion.files.wordpress.com/2013/01/hdoh-red-flags.pdf> ), we saw from the Sunahara death certificate that the document was not only forged at the HDOH, but somebody there deliberately put in red flags to make it clear that it was a forgery. Similar red flags were noted in the Ah Nee and Obama long-form birth certificates. Why were all those records falsified? The red flags showed up near or on the BC#'s, which points us to our next clue:

### **Clue #2: Four of the August 1961 BC#'s that the HDOH has disclosed were changed BY THE HDOH from their original 1961 owners – the 3 records with the red flags, and the short-form BC of Stig Waidelich.**

First some essential background on how the BC's were numbered. The documentation for this (and additional details) can be seen at <http://butterdezillion.files.wordpress.com/2013/03/hawaii-bc-numbering-system1.pdf> .

Each month the local registrars kept the BC's for births from each of the CDC's Hawaii geographic areas in their own region/batch in chronological order according to the time of birth. On the 4<sup>th</sup> of the month the outlying islands mailed all the BC's in their office to the state registrar. When those BC's were received at the state registrar's office, all the state's BC's for that month were placed in this order, numbered consecutively, and microfilmed for the CDC in BC# order with a cover sheet ("target") between the different regions:

1. Hilo, in chronological order
2. The remainder of Hawaii County, in chronological order
3. Honolulu, in chronological order
4. The remainder of Honolulu County, in chronological order
5. Kalawao County, in chronological order
6. Kauai County, in chronological order
7. Maui, in chronological order

So all the Honolulu births for August of 1961 were numbered in chronological order. After them come the BC's for the rest of Oahu, numbered chronologically.

We have apparently-HDOH-certified records showing the BC#'s for 5 children born at Kapiolani Hospital in Aug of 1961. But of those 5 people, only twins Susan and Gretchen Nordyke are in chronological order (Below, I will explain why Waidelich's BC# cannot be in chronological order).

Here are the HDOH's disclosed Kapiolani births in chronological order, with the BC#'s for comparison:

Name	DOB	time of birth	BC#	Notes
Barack Obama	Aug 4		10641	Blatant signs of forgery
Susan Nordyke	Aug 5	2:12pm	10637	
Gretchen Nordyke	Aug 5	2:17pm	10638	
Stig Waidelich	Aug 5	4:47pm	10920	Computer printout only

Stig Waidelich’s BC# is the most blatant anomaly. (See Exhibit A). He was born at the same hospital as Gretchen Nordyke, 2.5 hours later. For Waidelich’s BC# to be in chronological order, there would’ve had to be 281 babies born in Honolulu in the 2.5 hours between Gretchen’s birth and his - but the city of Honolulu averaged 22 births/DAY in Aug of 1961. (281 babies within 2.5 hours or 112 babies/hour, compared to the average rate of .9 babies/hour, is 124 times the average rate.) So babies would have had to be born at 124 TIMES the normal rate (12,400% rate increase), just during those 2.5 hours. Didn’t happen. Waidelich’s BC# is a total fabrication

In addition, we know that Virginia Sunahara was born at Wahiawa Hospital, which is outside of Honolulu. She was born on Aug 4<sup>th</sup> and so her BC# should be 4 days into the non-Honolulu Oahu births. According to the CDC’s statistics (as analyzed by me using the Nordyke BC#’s as the starting point at <http://butterdezillion.files.wordpress.com/2012/09/bc-number-manipulation-analysis.pdf> ), the BC#’s in August should have fallen somewhere around these ranges:

Honolulu births	10,539 through 11,222	(22/day)
Other Oahu births	11,223 through 11,781	(18/day)
Other islands	11,782 through 12,001	(7/day)

Four days into August at a rate of 18 births/day means Sunahara’s BC# should have been somewhere from 54-72 later than the first “other Oahu” BC#. So somewhere between 11277 and 11295. But the handwritten number on the death certificate (which had 3 red flags deliberately placed in that line) was 11,080. That BC# is off by about 200 and should belong to somebody born in Honolulu around Aug 25<sup>th</sup>. Ah Nee, whose BC# from the HDOH had overlapping digits (showing that the BC# was fabricated at the HDOH) was born in Honolulu on Aug 23.

Based on how the numbers fall, it appears that:

1. Obama was given the BC# that originally belonged to Stig Waidelich. (Waidelich was born about 2.5 hours after Gretchen Nordyke, and since the Honolulu rate was almost 1 child/hour, that could easily have made Waidelich the 3<sup>rd</sup> birth after Gretchen, which means that Waidelich originally had the 10641 BC# that Obama now has).
2. Stig Waidelich was given the BC# that originally belonged to Ray Piiohla, Jr (an infant born on Aug 20 who died at 2 days of age)
3. Virginia Sunahara was given the BC# that originally belonged to Johanna Ah Nee. (The timeline regarding the funny business with her record will be understood as we analyze the clues.)
4. Johanna Ah Nee was given the BC# that originally belonged to an infant who was born on Oahu but outside Honolulu around July 20<sup>th</sup>.

Obviously, because this analysis is based on statistics that presume a steady rate of births, the numbers may stray a little from the estimated ranges, but not a lot. Waidelich’s BC# in particular is problematic (with a 12,400% variance from the average birth rate within a 2.5-hour period). Yet that was the one

that the HDOH and CNN arranged to showcase right before Obama's forged long-form was released. It's almost as if they wanted to put a LOT of distance between Obama's BC# and the person who originally had that BC#.

At this point, no August 1961 vital record disclosed by the current HDOH is credible. They are falsifying and fabricating documents at will. The only credible sources for what really existed in 1961 are the original microfilm rolls, original paper records forensically tested, and the original WORM (write-once-read-many) disks onto which the images were stored from scans when the system was computerized/digitized. These are the documents that Congress should DEMAND AN IMMEDIATE independent investigation of (with Maricopa Co, AZ Sheriff Arpaio's Cold Case Posse taking part, for the sake of accountability).

**SUMMARY: Stig Waidelich's computer-generated COLB has a BC# that requires a 12,400% variance from the average birth rate within a 2.5-hour period. It is obviously falsified. So not only do we have paper records (1960-64 birth index, the Ah Nee and Obama BC's, and the Sunahara death certificate) being falsified by the HDOH, but we have the BC# in the computer system itself being falsified. And all these falsified certificates claimed BC#'s that could not have been on those BC's in 1961. Stig Waidelich is almost certainly the original owner of the BC# that the HDOH has verified as currently belonging to Obama.**

In the next installment we will look at the only circumstance in which a new BC# can lawfully be assigned to a person. That will be the key that opens the door on what the HDOH has done, when, and why. Everything we've seen makes sense when we realize how the HDOH could legally try to justify giving Obama the BC# that belonged to Stig Waidelich.

**CERTIFICATE OF LIVE BIRTH**

CERTIFICATE NO 151 1961 - 010920

CHILD'S NAME  
FIRST MIDDLE LAST  
JAMES JOHN WIDELICH

DATE OF BIRTH  
August 5, 1961

CITY, TOWN OR LOCATION OF BIRTH  
HONOLULU

MOTHER'S MAIDEN NAME  
MONIKA AKE SOTTEN SUOSTAM

TIME OF BIRTH  
8 45 PM

ISLAND OF BIRTH  
OAHU

SEX  
MALE  
COUNTY OF BIRTH  
HONOLULU

MOTHER'S RACE  
CAUCASIAN

FATHER'S NAME  
JOHN REED WIDELICH

FATHER'S RACE  
CAUCASIAN

DATE FILED BY REGISTRAR  
August 6, 1961

This copy serves as prima facie evidence of the fact of birth in any court proceeding. Other copies may be made.
